岑子傑先生於2026年6月9日提交的意見書

本人希望立法網約車，就跟中國大陸一樣網約車合法化，希望可以給市民多一個選擇

與規管網約車服務有關的4項附屬法例小組委員會

許甘先生於2026年6月9日提交的意見書

本人強烈反對將網約車配額上限僅設為 10,000 個。

此政策顯然是向多年來壟斷市場、把持既得利益的的士車主與業界傾斜。的士牌照多年來被形同民生炒賣工具，部分既得利益者為了維護自身利益，長期抗拒市場競爭，導致香港市民忍受了多年「拒載、揀客、搭車難」的痛苦。

網約車的出現，本是打破壟斷、體現共享經濟的良藥。若政府為安撫的士業界，硬性將配額壓至 1 萬張，現有運力將暴跌逾六成，車費更恐暴升七成。這等同用公眾福祉去補貼壟斷階層，令香港交通退步。

政府必須打破保護主義，以市民利益為先，將配額提高至更具彈性的 30000 張，還市民真正進步的出行選擇。

秦玉新女士於2026年6月9日提交的意見書

Uber平台自我規管已經非常棒，致府大可不必為咗臭名遠揚嘅香港的士行業而做咁多無謂野，支持Uber

與規管網約車服務有關的4項附屬法例小組委員會

YEUNG Kitty小姐於2026年6月9日提交的意見書

I think regulating ride-hailing and limiting to 10,000 does not make sense at all.

I like Uber service and it works very well. HK is a free economy, and why Legislative Council has so much time to waste on regulating ride-hailing services from different platforms?

Given recently so many traffic accidents in normal taxis and high age of taxi drivers, this should be the focus for Legislative Council.

YEUNG Carrie於2026年6月9日提交的意見書

全世界都咁普及嘅網絡車，唔知點解你哋政府要搞咁多規矩咁多要求，現在沒太多有規矩嘅時候人，哋而家都用緊啦！行駛中簡直阻人哋搵食，浪費人力物力拖延咁耐，浪費納稅人既金錢，陳美寶絕絕是失敗，簡單事情覆習化，縱容的士司機逃稅，呃市民車資，我相信只有的士公司及的士司機會反對，市民基本也一直都支持網約車，呢個係市民自由選擇，唔好再訂多問題去阻人搵食，香港已經好難搵食，連唯一生存都阻撓，又要考試，基本上有車人士全部也要考了報史及筆試，政府已經又夾硬要抽水考試費，真係太無腦太差

與規管網約車服務有關的4項附屬法例小組委員會

S0 Manson先生於2026年6月9日提交的意見書

Imposing a rigid 10,000-permit cap on Hong Kong's new ride-hailing framework is a step backwards for a city striving to be a smart global hub, and it will directly disrupt our day-to-day commutes. It is already an agonising, daily struggle to hail a traditional cab during rush hours, rainy days, or shift changes. Artificially choking the supply of alternative point-to-point transit will not magically improve the taxi industry; it will simply result in longer wait times, skyrocketing surge pricing, and thousands of stranded commuters left on the curbside.

A healthy, competitive market requires dynamic, consumer-driven supply, not a protectionist ceiling. We only need to look at our neighbours to see how other jurisdictions have navigated this transition. China's major cities successfully integrated massive ride-hailing networks alongside traditional taxis by letting market demand dictate supply, dramatically improving urban mobility. Singapore adopted a progressive, unified regulatory structure for both street-hail and ride-hail operators, focusing on safety and service standards rather than arbitrary vehicle quotas, which keeps their transport ecosystem highly responsive and efficient. Conversely, South Korea's rigid, restrictive approach and outright bans on non-taxi platforms caused massive late-night transit shortages in Seoul, forcing the government to constantly scramble with reactive interventions.

By pushing forward with a strict 10,000 quota, Hong Kong risks repeating South Korea's friction rather than replicating Singapore's balance or China's efficiency. The government's assumption that 10,000 vehicles can sufficiently cover 120,000 daily trips ignores the reality of peak-hour bottlenecks. If Hong Kong truly wants a modern, world-class transport system, it must scrap this arbitrary cap and let genuine public demand shape the market.

MASSEY Andrew先生於2026年6月9日提交的意見書

Statement in Support of Uncapped Ride-Sharing Services in Hong Kong

We are living in the 21st century. Hong Kong has long prided itself on being Asia's world city, a place that champions progressive outlooks, open competition, and forward-thinking governance. That progressiveness is precisely what gave Hong Kong its strength and success: free markets, consumer choice, and the relentless pursuit of excellence over protectionism.

Yet when it comes to urban transport, Hong Kong is embarrassingly stuck in the past. The Hong Kong Taxi Owners' Association Limited and its counterparts have mismanaged their civil duty to such an extent that they no longer deserve exclusivity in this 21st century free market. Their services are appalling. Elderly drivers who are clearly not fit to drive continue to operate, as evidenced by the alarming number of crashes and accidents, some of them fatal. Bad and aggressive driving is routine. Vehicles are old, poorly maintained, and not kept up to date. Service is rude, with drivers selectively choosing whom to pick up, overcharging passengers, and declining to drive to destinations they are duty bound to serve.

These associations are corrupt, hiding behind protectionism within the Hong Kong government, which is shocking and shameful. It reflects extremely badly on the Hong Kong government establishment. This obvious graft is at risk of undermining public trust in the government itself, because citizens can see exactly what is happening: a privileged cartel being shielded from competition while the public suffers.

What is seemingly being overlooked in this entire debate is the end customer: the people of Hong Kong, whom taxi and ride-sharing services exist to serve. What good does limiting vehicle numbers do except to frustrate ordinary people and drive up prices through artificial scarcity and overcharging? It also pushes more residents to buy private cars and hire drivers who then illegally double park and

clog up the roads, making traffic worse for everyone. This needs to be penalised, whilst the government should be promoting multi-person vehicular use that actually reduces congestion.

Safety should be paramount. There must be a mandatory retirement age of 65 years old for all commercial drivers. There must be regular inspections of all commercial vehicles, including the installation of tachometers to ensure drivers have not been speeding, driving dangerously, or operating without adequate rest and indication.

Anything less than this will cause a public outcry that the government is not acting in the best interests of the people, and is implicit in some kind of corruption. The time for reform is now. Open the market to ride-sharing services, hold the incumbent taxi industry to proper standards, and put the citizens of Hong Kong first.

與規管網約車服務有關的4項附屬法例小組委員會

施詠小姐於2026年6月9日提交的意見書

本人認為要把Uber發牌數目增加

增加業內競爭 提高司機及服務的質素

若果過分限制Uber的發牌數量 長遠而言，只有對現金有禮貌的的士司機有好處 對市民而言 除了服務態度 以及方便程度 也是百害而無一利

而Uber的Apps 還可以對司機作出評分及意見 就算遺留了東西在車上面 平台也能協助市民提供服務 與傳統的的士服務比較下 具有非常的優勢

與規管網約車服務有關的4項附屬法例小組委員會

林卓聞先生於2026年6月9日提交的意見書

Dear Chairman and Members of the Subcommittee,

I am writing to formally submit my views regarding the four pieces of subsidiary legislation currently under review by the Subcommittee concerning the regulation of ride-hailing services in the Hong Kong Special Administrative Region.

While I support the Government's initiatives to establish a clear legal framework that ensures passenger safety, vehicle insurance coverage, and high quality of service, I would like to express a critical recommendation regarding the supply and management of ride-hailing vehicle licenses or quotas.

To preserve Hong Kong's current urban mobility standards and ensure public convenience, it is vital that the Government increases the total allowable number of authorized ride-hailing services/vehicles, rather than imposing restrictive caps that fail to meet actual market demand.

My recommendation is based on the following key considerations:

Preserving Current Service Levels and Public Convenience:

Ride-hailing services have become an integral part of Hong Kong's daily transport ecosystem, filling critical gaps in point-to-point transit, especially during peak hours, inclement weather, and in areas underserved by traditional public transport. Restricting the number of legal ride-hailing vehicles below existing market capacity will inevitably lead to longer passenger wait times, a drop in service reliability, and severe public inconvenience.

Mitigating "Surge Pricing" and Inflated Consumer Costs:

Basic economic principles dictate that if the supply of authorized vehicles is kept

artificially low while demand remains high, consumers will face significantly higher fare prices through dynamic surge pricing. Maintaining a higher total number of available services ensures healthy market competition and keeps point-to-point transit affordable for everyday citizens.

Supporting Hong Kong's Tourism and "Smart City" Ambitions:

As an international financial hub and a premier tourist destination, Hong Kong relies heavily on seamless, digital-first transport solutions. Modern travelers expect robust, readily available ride-hailing options. A restrictive quota would hinder our alignment with global "Smart City" benchmarks and negatively impact the visitor experience.

Conclusion & Recommendation

To successfully integrate ride-hailing services into Hong Kong's regulated transport framework without disrupting the city's efficiency, I strongly urge the Subcommittee to recommend a flexible, demand-led licensing mechanism. The total number of permitted ride-hailing vehicles must be scaled upward from current baseline usage to effectively maintain—and future-proof—our city's excellent service standards.

Thank you for your time, consideration, and dedication to refining this vital piece of legislation. I am comfortable with this submission being uploaded to the Legislative Council website for public viewing.

Yours faithfully,

Sherman

與規管網約車服務有關的4項附屬法例小組委員會

RIDGERS William於2026年6月9日提交的意見書

The Hong Kong government has a duty to serve its citizens, businesses and visitors. Ride hailing services have improved the transport infrastructure of Hong Kong immeasurably, allowing people much better choice, much lower waiting times and access to destinations that taxis often disdain. Ride-hailing vehicles are on average more modern, cleaner and more spacious than taxis. Rickety old red and green taxis, we should admit, are an embarrassment for those who have visited any modern, international city.

If Hong Kong aspires to be a modern, technologically advanced city, it would not artificially curtail the number of ride hailing vehicles available. It would allow consumers to make their own choice of which service they prefer.

支持網約車合法化，能為司機提供**合法保障與穩定收入**。透過完善的法規監管與平台派單機制，司機不只能免於罰款風險，還能獲得源源不絕的客源。這不僅能優化大眾出行體驗，更為無數家庭帶來安心、可持續的經濟支柱。

支持維持現有3萬牌照 足夠市民所需。

與規管網約車服務有關的4項附屬法例小組委員會

LEE Joseph先生於2026年6月9日提交的意見書

Honourable Members, I urge you to reconsider the proposal to cap ridesharing at only 10,000 licences, as this restriction directly harms the public you serve. Hong Kong residents have long endured inconsistent taxi service, poorly maintained vehicles, and drivers whose behaviour too often falls short of acceptable standards. Ridesharing has filled this gap by offering cleaner cars, better service quality, and a level of reliability that many citizens now depend on. Around the world, ridesharing is recognised as the future of urban mobility, yet Hong Kong risks falling behind by protecting outdated interests. If this policy is being shaped to safeguard the financial positions of a small group of taxipermit holders rather than the needs of millions of ordinary residents, it would be a grave mistake - one that the public will remember for a very long time. Hong Kong deserves a modern, competitive, and customerfocused transport system, not artificial limits that hold the city back.

RANGANI Pitamber 於2026年6月9日提交的意見書

I personal and my family use Uber regularly and my parents are elderly. It is so disappointing HK is keeping the cap of only 10,000 Ubers and yet HK calls itself a “ free market “. This is totally the opposite of a free market and my parents who are seniors use uber often as they are more reliable and kinder. Also for tourism where riding apps are so common now and by limiting the number of Ubers just makes supply an issue and put of tourists. It's truly the most backward of thinking and sadly this is why HK is losing its charm. Let there be unlimited Ubers and let the market decide of demand and supply. By HK controlling the supply just shows the backward thinking sadly.

CHIU Lok-kwan於2026年6月9日提交的意見書

The new proposal to approve 10,000 license to third party drivers is not sufficient to solve the shortage of taxi/private drivers in Hong Kong. Considering the lack of taxi service during peak hours, and their incompetent service, I advocate to expand the license numbers to above 20,000 as soon as possible.

與規管網約車服務有關的4項附屬法例小組委員會

陳丕賢先生於2026年6月9日提交的意見書

對於政府目前對於網約車的規管，本人是持有反對的意見。

首先網約車的設計初衷理應方便人們使用而且價格相對合理，如果限制發牌，車輛大幅減少必定導致人們無法以方便乘坐為首要目標，而價格相信亦會上漲，並不親民。

其次，當下市道差就業難，學位亦貶值，網約車能夠提供就業機會給非專業人士謀生計。以內地為例，網約車和外賣為基層人士提供另一種收入來源。而且網約車亦能夠幫補有家庭人士的收入，政府理應加強支持，而非限制發牌，提高其門檻對以網約車為收入來源人仕，會造成一定打擊。

第三，網約車的行車安全有很多其他方法去確保，例如內地會強制網約車司機購買網約車專用的保險，保障其乘客自身的權益。本人覺得限制10,000張牌只是單純確保的士牌照的地位，而漠視另一面的意見和好處。的士在網約車在平台上共存，深圳給予了很好的實際發展例子。

最後，商場上理應是自由開放的，而市場熱度亦都反映出實際情況。為何人們更加傾向選擇網約車，相信其為人們帶來的優勢好處必定是明顯的。限制發牌此舉除了令一部分人仕失去生計，更給商家們發出負面形象的訊息，令人覺得香港對營商和創新上是充滿阻礙。

希望當局多參考內地有關網約車市場發展和規管，而非故步自封，以不做不錯的心態去處事。

與規管網約車服務有關的4項附屬法例小組委員會

RANGANI Jia於2026年6月9日提交的意見書

Hi, I myself use uber a lot. Recently the weather has been so bad and Impossible to get a taxi. Thanks to uber I was able to get to work. By limiting the number of Ubers is just slowing down efficiency of HK. HK is known to be a quick and efficient city. But limiting the number of Ubers just makes HK an inefficient city. Please let there be at least 30,000 Ubers in the city and let businesses run, by having this controlling system just shows HK does not care what HK public are asking for. Thank you.

與規管網約車服務有關的4項附屬法例小組委員會

GANATRA Monit於2026年6月9日提交的意見書

The proposal includes a strict quota of 10,000 vehicle permits for all ride-hailing services, a lottery-based allocation mechanism and dynamic adjustment mechanism. These could limit future supply and our riding experience. This could lead to longer wait times, higher prices, and fewer choices when we need a ride. I request not to pass this legislation

與規管網約車服務有關的4項附屬法例小組委員會

李嘉林先生於2026年6月9日提交的意見書

I believe it is of public interest to have unlimited quota on vehicle permits for all ride-hailing services so as to provide the best services (shorter wait time, lower prices, more choices) for passengers.

與規管網約車服務有關的4項附屬法例小組委員會

陳俊諺於2026年6月9日提交的意見書

一、 前言

本人歡迎政府將網約車合法化及納入規管，這有助保障公眾安全並提升服務質素。然而，對於當局建議現階段將網約車車輛許可證上限設為 10,000 個，本人深表憂慮。此配額嚴重低於市場實際需求，恐將引發市民出行難、旅客體驗差及基層司機失業等連鎖效應。特此提出優化建議。

二、 核心理據

1. 1萬配額遠低於市場實際需求，恐推高車費

政府估算 1 萬輛車每日可提供約 12 萬個行程，但這忽略了上下班、惡劣天氣及節假日等高峰時段的爆發性需求。若硬性限制數量，將導致：

市民及旅客在高峰期的候車時間顯著延長。

供需嚴重失衡，可能推高高峰期車費，削弱香港作為國際城市的出行便利性。

2. 嚴重衝擊現職基層司機生計

目前本港活躍的網約車司機遠超 1 萬人。靈活就業是許多基層市民維持生計、幫補家計的重要渠道。在僵化的 1 萬個配額限制下，預計將有超過五成現職司機因無法取得許可證而被迫停業，對本地就業市場造成沉重打擊。

3. 的士與網約車定位不同，應達致雙贏

網約車與傳統的士在客群定位上有明顯差異。增加合法網約車供應，能推動整個點對點交通行業良性競爭、提升質素，滿足市民多元化的出行需求，而非「零和博弈」。

三、 具體優化建議

為平衡道路資源與市民出行權益，建議立法會促請政府採取更具彈性的規管框架：

建議 1：調高初始配額至 15,000 至 20,000 個

參考學者及智慧交通業界估算，初始配額應至少設於 1.5 萬至 2 萬個之間，以維持市場基本運力，防止新規落實初期出現嚴重的「全港缺車」混亂。

建議 2：引入以數據驅動的「動態調整機制」

建議每季度檢討一次配額。政府應參考各平台提交的數據，包括「高峰時段平均候車時間」及「行程完成率」。若數據顯示供不應求，應自動啟動增發機制，如每次增發 10% 許可證。

建議 3：優先發牌予現職良好紀錄司機

在發牌機制上，應優先考慮擁有良好安全紀錄、經營年期較長的現職網約車司機，保障現有從業者生計。

四、 結語

規管網約車的初衷應是「與民方便」。懇請各位議員審議相關規例時，充分考慮市民與旅客的出行體驗，督促當局放寬保守的配額限制，構建更具彈性的智慧出行城市。

與規管網約車服務有關的4項附屬法例小組委員會

蘇家偉先生於2026年6月9日提交的意見書

由於目前網約車輛比起傳統車輛(的士)較為方便及簡單，如限制只有10,000 個網約車輛許可證配額上限、採用抽籤方式分配配額、動態調整機制，只會變成另類的士牌照，並有可能被人濫用及私下租出有關牌照。更會大幅影響日後乘車體驗。另外，配對車輛的時間可能需時更長、價格更高，以及出行選擇減少。

因此本人強烈反對此附法例。

與規管網約車服務有關的4項附屬法例小組委員會

LUK Regina於2026年6月9日提交的意見書

I do not think it is fair to limit 10,000 licenses for for-hire ride share. This will limit consumers' option to choose their desirable mode of transportation and limit healthy competition among providers for better services. Hong Kong is a developed district and should enjoy the same advanced share-ride transportation options like other Asian countries and North America.

高雯依小姐於2026年6月9日提交的意見書

的士服務一直持續態度惡劣，下雨天時拒載，我曾試過與小朋友上學的時候正在下雨，截的士時該的士並沒有載客，也沒有打旗，亦沒有被別人預約的紙牌，該的士無視我和小朋友的揮手，事實上很多的經驗很多的個案讓我們市民看到的士行業是一個手法卑劣沒有任何服務態度的行業，如果沒有網約車的出現，的士獨霸市場並不會作出任何的檢討，網約車的出現的是行業受到打擊，是合理的，市場需要網約車，需要足夠服務市民的網絡車隊，自從網約車的出現，我個人的生活方便了很多，即使付出比的士更昂貴的價錢，亦樂意接受，但是，如果因為的士生意淡薄，而將網約車的價格大幅提高，這個原因，是讓市場把生意讓給的士，這是這次檢討的背後最大利益關係。如果的士能夠提供到如網約車的質素，網約車根本沒有生存空間。請正視的士的問題，而不是網約車的問題。就算政府檢討過後的士服務也維持惡劣的服務態度，尤其是雨天，黑雨黃雨紅雨，的士行業是趁火打劫的一群

與規管網約車服務有關的4項附屬法例小組委員會

HAN Lydia女士於2026年6月9日提交的意見書

Pls approve the ride-hailing services with NO ceiling to the license permit number in HK ASAP. We have been waiting for this service to be legalized for more than 10 years. The current taxi service is terrible, cars are old, drivers are also very old, bad tempered, inflexible, always reluctant to take long route to new territories. While the drivers from the ride hailing services are usually more polite, friendly, accommodative, younger drivers, more updated car models, well maintained, clean and efficient. The current number of taxis is only 18000s which is for a population of 7.5million; the ratio is far too low. We should have more ride-hailing services to close the gap. HK being an open and free economy, there should not be a quota of 10,000 vehicle permits for ride-hailing licenses. We should leave it to the market demand to decide. If drivers are not making money, they will move out of the industry voluntarily. What is the point to set a ceiling to the license.

與規管網約車服務有關的4項附屬法例小組委員會

QUE Alex先生於2026年6月9日提交的意見書

I think it is wrong to limit the licenses to 10,000. This is putting the legacy interests of taxi owners before the interests and greater good of the general public in Hong Kong and more importantly visitors to our city, the premium ones of which will need the convenience of being able to timely call a call. Adopting such a limit will inevitably result in Hong Kong offering poor services in this area and lagging behind all other major advanced cities, including basically all the cities in China where it is almost always very convenient to call a car.

The government could consider how to support the taxi drivers as appropriate, but this should not be done at the expense of the general public and the image of Hong Kong to its visitors, such as by way of artificially limiting the number of licenses using excuses such as unrealistic assumptions and calculations based on outdated statistics. There should not be any limit at all. While unregulated now, there is no artificial limit and the operations have in general been welcomed by everyone. I just do not see why excuses would need to be made up to create an artificial limit now which is certainly not an improvement over the current situation but represents a huge step backwards.

MAK Steven先生於2026年6月9日提交的意見書

網約車，Uber又好 其他都好 從來都係為民而生 科技既發展既後果

無論你幾有科學根據 你都應該以市民角度先出發 重唔好提一少數的士既 owner（司機唔影響 因為有uber taxi）但係越多uber 司機，越多supply，價錢就會下跌，受惠既係市民 有合理價錢 快速 便利 有車 唔好忘記 香港的士已經又殘又舊 重要俾現金 完全落後全世界 除非你係的士牌既車主或投資者 如果唔係 你同樣作為一個香港市民 我唔信你有野可以反駁我 如果制定今次網約車既政策人 應該要有負責制 如果做得唔岩 麻煩你離開 政府工唔應留呢啲廢物 要保守 去做保安 小巴司機啦 制定政策要有遠見 要聆聽 廢物唔好阻住香港發展

與規管網約車服務有關的4項附屬法例小組委員會

吳昊於2026年6月9日提交的意見書

致立法會相關小組委員會主席及各委員：

針對政府近日就網約車服務提出的附屬法例建議，本人充分肯定政府推動網約車合法化及規範化的決心。然而，從管理學與公共政策角度來看，過於僵化的數量管控恐將背離提升市民出行體驗的初衷。

為此，本人建議放開硬性配額限制，轉而從提高准入門檻與加強合規管理著手，以市場機制配合嚴格監管，確保為香港市民提供優質、穩定的網約車服務。具體與建議如下：

一、現行配額與抽籤機制的弊端

1. 人為製造稀缺，導致「市場失靈」與市民利益受損

在管理經濟學中，當市場的真實需求遠大於人為設定的供給上限（10,000個配額）時，必然會導致嚴重的供需失衡。這不僅會削弱平台的規模效應，更將直接轉化為乘車價格的攀升（Surge Pricing）以及乘客等候時間的延長。香港作為高密度的國際大都會，出行需求具備高度的時空波動性，硬性配額無法應對高峰時段的彈性需求，最終將降低整體社會的出行效率。

2. 抽籤機制導致「資源錯配」與「尋租行為」

採用抽籤方式分配配額，在資源配置上屬於極低效的機制。抽籤具有隨機性，無法將許可證分配給服務質量最好、營運效率最高的司機或車隊。這可能導致部分獲得配額的車輛閒置或兼職營運（佔用配額但不提供穩定供給），而真正具備專業服務意願的優質司機卻被拒之門外。此外，這類稀缺牌照極易在市場上衍生出暗盤交易或「尋租行為」（Rent-seeking），無助於提升行業整體服務質素。

二、政策建議：由「數量管控」轉向「質量管控」

現代公共服務管理理論提倡「以質為本」的監管思維。政府的職能應是設定安全與品質底線，而非直接干預市場供給量。

1. 取消配額上限，設立「高標準准入壁壘」

建議以「資質審核」取代「名額限制」。只要車輛與司機符合政府規定的嚴格標準（如車齡限制、司機经适当培训且社会记录良好等），即應獲發營運許可。透過較高的合規成本（如要求購買足額的商業載客保險等）作為自然的市場過濾機制，讓市場供需自行調節網約車數量，從而實現良币驱逐劣币。

2. 強化服務過程的動態合規管理及数据分析

政府應將重心轉移至發牌後的監管。

依託平台數據與乘客評價，建立嚴格的司機扣分與停牌退出機制；同時落實「平台連帶責任」，若平台未能有效監督旗下車輛，政府可對其施以罰款或限制營運。

同时，应要求網約車平台共享脫敏交通數據。當特定區域或時段交通負荷過大時，透過平台算法引導車輛分流。

懇請委員會考慮上述建議。

香港文化教育聯合會吳昊博士敬上

LAU Alan於2026年6月9日提交的意見書

個人認網約車許可證配額10,000個認為太少，只會助長的士牌價飆升，跟住車主肆無忌憚加車租，之後的士司機就話經營成本上漲，就向政府申請的士加價，根本就沒完沒了，根本源頭問題就是的士車主。請問政府有沒有研究過現時擁有的士最多是甚麼人？是否跟政府申訴網約車配額太多會影響的士司機生計那班人？若果之前不是他們將的士牌價作炒賣，就不會令司機租車車價上漲，導致司機生計受影響吧！

為何會有網約車出現問題呢？的士業界應該要先行規管好司機，現時約有一半的士司機，當接載到短程客時都會給乘客黑面或態度差，還有乘客到達目的地後，收款時9成以上司機都會自動將的毫子尾數變為整數收費，當服務質素差時，要多付 1 毫都會嫌多吧。

事實上，除了的士司機服務態度差外，點解這幾年市民不直接在街上截的士而會選用較貴之網約車呢？原因就是：

1. 天氣太熱，不知幾時可以在街上截到的士；
2. 預約網約車可以看到大約幾時到達，根據到達時間落樓上車；
3. 網約車能預計到達目的地的價錢，可自行釐定是否選用網約車；
4. 網約車司機不論是長程或短程車，都不會有面色給乘客，因為長短途車程都是司機自行選擇接單。

所以若然政府將網約車許可證配額增加，可以加強對的士司機質素，亦可令的士車主受壓下對司機租車成本減輕，而對市民就會有較多的選擇空間。

限制uber數量無益於私人載客市場

uber牌照和taxi牌照的數量限制只會造成壟斷市場

有牌照的成為最大贏家 壟斷市場 也不需要因為競爭市場而提升自身服務

但供應低於需求的時候

有牌照的taxi 和uber有恃無恐 不擔心找不到客源

不利於整個市場環境和客戶體驗

BROCKWELL Jason於2026年6月9日提交的意見書

Taxi regulation was introduced during the Great Depression in the 1920s and 1930s in an attempt to bring order to chaotic cities as desperate unemployed men tried to make a living by offering taxi services. It did indeed bring a little more order to these cities, and the lucky owners of the newly created taxi medallions were able to make a living, while the unlucky losers starved.

Hong Kong in 2026 is not New York, Toronto, London, or Paris in 1926, but we are hearing the same arguments today as were heard in those cities 100 years ago!

The regulations mostly protected incumbents, to the detriment of traveling public, historically and worldwide, taxi regulation has mostly protected incumbents, to the detriment of traveling public - let's not repeat these mistakes with new regulation.

The current mix of taxis and ride-hailing services is working well - I'm not sure there is any demand from the traveling public or from a road safety point of view for new regulation. If existing taxi licence holders are complaining, that's a good sign. Most of the profits from taxi operation goes to rich licence holders, not poor drivers. We should be looking forward to the day when a taxi licence has no financial value and is purely for the purpose of ensuring safety.

If ride-hailing services are to be licenced, the licensing system should be:

1. Flexible - with numbers able to adapt to demand;
2. Free - licences should have no monetary value - the cost of any licence is passed on to the traveling public;
3. Future-proof - any licensing system should be able to adapt, without new legislation, to the imminent and inevitable arrival of driverless vehicles. Let's make

Hong Kong one of the first cities to enjoy the safety, convenience, and improved urban environment that driverless vehicles will bring.

According to the Transport Department, Hong Kong averaged 90 traffic fatalities annually from 2021 to 2025, and the number is not falling. Driverless vehicles offer a chance to reduce the fatalities to near zero. Any ride-hailing legislation must allow for rapid introduction of driverless vehicles in order to save lives. One of the best use-cases for driverless vehicles will be ride-hailing. Any legislation must enable rapid introduction of driverless ride-hailing as an urgent matter of public safety. Each month of delay will cost about 7 Hong Kongers their lives.

The current suggestion of 10,000 licences restricted to individual owner-drivers meets none of my three proposals; will burden the traveling public with greater cost for worse service; make Hong Kong as a whole poorer; and, most likely, cost many Hong Kongers their lives. Don't do it!

反對設定 10,000 個網約車輛許可證配額上限。

與規管網約車服務有關的4項附屬法例小組委員會

馬堅偉先生於2026年6月9日提交的意見書

本人反對將網約車輛許可證配額上限定為 10,000 個，並以抽籤方式分配。

網約車制度的原意，是讓擁有車輛及空閒時間的市民能夠靈活提供點對點交通服務，從而增加市場供應，提升市民出行選擇。若以固定配額方式限制至 10,000 輛，實際上與傳統的士牌照制度無異，既無法反映市場實際需求，亦會限制行業發展及創新。

如果政府需要透過牌照制度管理網約車，倒不如直接增發新的士牌照。然而，過去多年來，的士牌照制度已證明未能有效解決服務質素問題。政府雖然發出了的士牌照，但對部分司機拒載、兜路、服務態度惡劣等問題，長期缺乏有效監管及執法，令市民對的士服務產生不滿。

相反，網約車平台具備評分、投訴、行程記錄及司機身份追蹤等機制，能夠更有效地監督司機服務質素。服務表現欠佳的司機會直接影響接單機會，甚至被平台停權，形成市場自我監管機制，這是傳統的士行業較難做到的。

因此，政府應以安全、保險、司機背景審查及服務質素作為監管重點，而非以人為設定的配額限制市場供應。配額過低只會導致供應不足、候車時間增加、車費上升，最終損害市民利益。

本人建議政府讓市場需求決定網約車數量，並建立完善監管框架，確保公平競爭及服務質素，而非複製現時的士牌照制度的問題。

TOMMY Wong先生於2026年6月9日提交的意見書

國際大都會必須有UBER 作為主要競爭者，以加強各公私營交通工具的服務質素。

與規管網約車服務有關的4項附屬法例小組委員會

許連燈先生於2026年6月9日提交的意見書

本人作為日常依賴點對點交通服務的香港市民，對於政府正推進的網約車規管附屬法例表示高度關注。本人支持將網約車納入合法合規的監管體制以保障乘客安全，但同時深切擔憂現時建議中過度嚴格的限制——特別是將首階段網約車許可證上限設為 1 萬個，將嚴重削弱市民日常出行的方便性。

目前，網約車已成為本港多元交通生態中不可或缺的一部分。現時活躍的網約車數量遠超 1 萬輛，若政府硬性將牌照削減至 1 萬個，在供需嚴重失衡下，必然會導致市民「叫車難」、候車時間大幅延長，甚至引發車費飆，最終損害廣大市民的利益。此外，新例實施「人車綁定」，限制了車輛的營運時數，一萬輛網約車的實際運力根本無法滿足市場龐大的高峰期需求，亦會削弱香港作為國際旅遊城市的形象。

因此，本人強烈建議政府在落實法例時應保持彈性，切勿過度限制。網約車許可證的數量應提升並保持在 2 萬至 3 萬個之間。這樣的規模既能展現政府銳意改革個人化交通服務的決心，亦能真正符合市場供需的公允值，確保市民在上下班、惡劣天氣或深夜等出行高峰期，依然能享有便捷的起行體驗。

期望政府能以「利民出行」為依歸，多聽取廣大市民與用家的聲音，放寬數量限制，讓的士與網約車在公平健康的市場環境下優勢互補。

張裕發先生於2026年6月9日提交的意見書

合作的網約車司機如果只有萬多人，確實太少，此舉只能令市場更亂，挺而走險的人更多。

另外網約車司機如未能於某些註冊網約車平台成功加入，又等於未能合法載客取酬，灰色地帶可以會有好多。會否考慮網約平台司機可以為已註冊旅行社接載客人，只是不能收取費用(小費除外)。此舉可避免司機私人在無規管濫收車資，又可對現時疲弱的旅遊業一個支持

H J先生於2026年6月9日提交的意見書

I am concerned that a quota of 1,000 permits and a lottery-based allocation system would limit the supply of ride hailing cars and ultimately leave the public with less choice. There should be no limits and ride hailing firms should be able to operate freely. It is about time to break the licensed taxi monopoly. In my experience, most ride-hailing drivers are friendly, whereas the typical taxi driver is often rude, doesn't talk and only accepts cash. Let the free market decide on whether people in Hong Kong prefer traditional taxis or ride-hailing services.

與規管網約車服務有關的4項附屬法例小組委員會

LUN Joseph先生於2026年6月9日提交的意見書

Dear Members of the Legislative Council,

I am a frequent user of both ride-hailing and taxi services in Hong Kong, as I do not own my private vehicle.

I am writing to express my support for the expansion of ride-hailing licences in Hong Kong, including licences for Uber and other regulated platforms. A more open and well-regulated ride-hailing market will improve transport choices, enhance service quality, and better meet the daily mobility needs of residents and visitors. Hong Kong's Legislative Council has already moved to regulate ride-hailing services, and the next step should be a licensing framework that allows sufficient supply to meet demand.

Hong Kong has long needed more travel options beyond the traditional taxi model. Ride-hailing gives passengers the convenience of app-based booking, driver quality ratings, real-time vehicle tracking, and clearer estimated arrival times, which many consumers now expect as standard service features. These practical benefits can create a better overall experience for the public, especially for commuters, families, tourists, and elderly passengers who value reliability and ease of use.

I also urge the Legislative Council to consider the issue of waiting time carefully. Where ride-hailing supply is too limited, passengers may face longer waits and higher fares, especially during peak hours, bad weather, or in areas with weaker taxi coverage. Public reports have already warned that restrictive caps can lead to higher prices, longer waiting times, and reduced service quality.

At the same time, I believe the licensing framework should be designed to raise overall service standards rather than simply preserve existing market structures. Many passengers have experienced poor service quality in the taxi sector,

including inattentive driving, inconsistent customer service, and limited responsiveness to consumer expectations. A properly regulated ride-hailing market can encourage stronger service discipline, better customer care, and healthier competition, which benefits the public interest.

I respectfully submit that Hong Kong should issue a sufficient number of ride-hailing licences to ensure meaningful competition and adequate supply. A balanced approach would protect safety and regulatory standards while avoiding an overly restrictive quota that could weaken service availability and consumer choice. Hong Kong's transport system should be modern, efficient, and responsive to public demand.

Thank you for your consideration.
